

70 stunning metallic colours.

The shimmer of metallic - **EXTENDED.**

Introducing the **EVIC GROUP METALLIC** colour card, offering 70 truly spectacular metallic colours available for interior surfaces, exterior finishing and glass.

Subtle hues and vibrant tones. They're all here!

Interior. Exterior. Glass.

We understand each area of application has a different set of requirements: Use 1602 GLOBAL™ Metallic or 1605 Lumina on interior surfaces; Apply the new 946 CERAMEVIC-R(M)™ on substrates that require exterior-quality protection (forget powder coating!); and for glass, use the new 1046 METALGLAZE™ with more metallic flake and more intense pigments, it's yet another addition to the PearlGlaze™ glass range.

1602 GLOBAL™ METALLIC/1605 GLOBAL™ LUMINA
1046 METALGLAZE™
946 CERAMEVIC™ R(M)

metallic/

Looks and durability, too.

Unlike other decorative metal-look finishes, all Evic Group metallic finishes are polyurethanes with proven durability, designed for high-wear areas like kitchens, vanities, decorative glass, glass splashbacks, exterior panelling and other commercial fixtures.

A beautiful finish built to last.
